6. BACKGROUND: (WHY IS THE ACTION NECESSARY, WHAT GOAL WILL BE ACHIEVED)

Staff requests authorization to continue the phased site restoration of Conservation Park as called for in the longterm site management plan. The upland areas in the park historically consisted of a scattered longleaf pine forest with grass lands, but the previous owner's practice of tree farming coupled with fire suppression had dramatically altered the site. Most of the commercially planted slash pine trees have been removed during the past 7 years to allow space for replanting native longleaf pines. To date, approximately 600 acres on site have been replanted with 190,000 longleaf seedlings. 130,000 wiregrass seedlings have also been planted throughout the park.

The next phase of the restoration plan is to plant another 230 acres with 70,000 longleaf seedlings and 26 acres with 72,000 wiregrass seedlings in February 2019. Due to high demand for these seedlings, and limited availability, orders typically need to be placed as early as possible to be able to obtain the needed quantities.

The most cost effective source for the City to obtain the desired quantity is to purchase directly from the State of Florida through its Andrews Nursery near Chiefland. An order form in the total amount of \$30,920 for the required seedlings is attached for your review. Payment is required at the time orders are placed, and if delivery cannot be made, the state would refund the City's money. Staff intends to use specialized contract labor to hand plant the seedlings after preparatory prescribed burns are completed. Labor for planting will be bid this fall and that additional cost is estimated to be approximately \$30,000 to \$35,000. Staff recommends approval of the purchase and funds are in the current wastewater system budget.
