Subject: Construction Bids – Nautilus Lift Station No. 7 Replacement Project

---

Staff budgeted funds this year to replace one of the City's primary wastewater lift stations, which is located near Nautilus Rd and Front Beach Road behind the Hidden Lagoon go-kart track. The lift station is 27 years old and approximately 25% of the total sewer flow to the City wastewater plant is pumped at this location. Due to age and wear, most of the station components have reached the end of their service life. The new design will provide more capacity, improve system reliability and reduce maintenance needs for the next 25 to 30 years. A portion of the ductile iron sewer force main leaving the site is also being replaced with a larger PVC pipe. Baskerville-Donovan, Inc. is the City's engineering consultant for the project and completed all design and permitting necessary to bid the construction work.

The project was publically advertised and seven (7) bidders responded with sealed bids by the required date and time. Bids were publically opened on March 4<sup>th</sup> beginning at 10:00 AM. After reviewing the bid documents, Baskerville-Donovan recommends that the Base Bid be awarded to the low bidder, Marshall Brothers Construction & Engineering, Inc., for the base contract amount of \$2,235,780.00. The consultant's recommendation and bid tabulation are attached for review. Five different alternate bid items were included in the bid form, but neither the consultant nor staff recommends accepting any of the alternates at this time. Staff concurs with the base bid award recommendation and further recommends approval by Council. A draft construction agreement is also attached for your review. The wastewater utility has sufficient funds available to enter into a contract for the work, and the project is included in the current fiscal year budget. Construction will take approximately 11 months and staff expects the new station to be fully operational within 30 days thereafter. The old station will then be demolished as part of this same contract.

RE: Nautilus Street Lift Station No. 7 Replacement  
BDI Project No. 023249.01  
Panama City Beach, Florida

Ref.: Transmittal of Bid Tabulation and Bid Originals

Dear Mr. Shortt:

Enclosed are three (3) copies of the certified bid tabulation and the original bids with supporting documentation as received on March 4, 2015. The bid grouping is very close for the seven bids received indicating uniform understanding of the bid documents. Marshall Brothers Construction & Engineering, Inc. (MBCE) has submitted the lowest responsive base bid. For reference, this organization was formerly known as Marshall Brothers Industrial, Inc. and has done work previously for the City under this name. The weighting of their bid was also comparable to the others bidders. It should be noted that MBCE noted a \$25,000 deduction to be applied to their Base Bid amount and the tabulation of bids reflects this credit. Similarly, MBCE also apparently changed the amount of the testing allowance (Base Bid Item 16) from \$5,000 to \$10,000 which artificially skewed their bid upward by \$5,000 compared to other bidders. Their bid has been modified accordingly in the tabulation of bids and will be corrected in the contract documents.

There were five alternate bid items provided which target providing competing materials for the Base Bid forcemain pipe and coating system which are single sourced. The alternate forcemain pipe material came in as an additional cost to the Base Bid cost and it is not recommended for further consideration. Similarly, the alternate coating system bid also was a greater cost than the base bid product and is also not recommended for further consideration.

An alternate bid was also requested for a lesser sound reducing rated (allows more noise to escape the enclosure) generator enclosure. No deduction was offered by MBCE in their bid for the lower grade sound reducing enclosure and is not recommended for further consideration. A deduction for painted carbon steel motor control center enclosures was requested and MBCE has offered a \$9,630 deduction for enclosures made of this material rather than the stainless steel units in the Base Bid. As this is a coastal application and even though the units are proposed to be located within an air conditioned building, this savings may be used up quickly if the units are painted more than once during their service life.

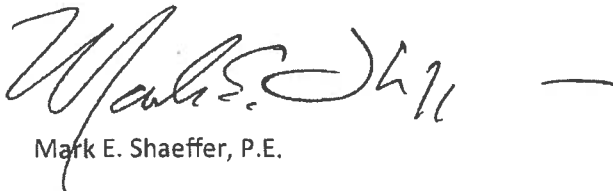

Finally, an alternate bid for a chemical resistant concrete admixture in lieu of the Base Bid coating system was also solicited. MBCE has offered a \$20,100 deduction for the use of this material instead of preparation and coating the structure. Given that the City and Baskerville Donovan, Inc. have no experience with the substitute product, it is recommended that the Base Bid amount be awarded and the City staff allowed to conduct a more detailed analysis of the alternate concrete compound. If staff finds sufficient data to determine this enhanced

concrete system's performance is equal to or better than the Spectrashield coating product in the Base Bid, this cost reduction can be accomplished later via change order during the construction contract.

A check with the State of Florida Department of Business and Professional Regulation indicates that Marshall Brothers Construction & Engineering, Inc.'s qualifying agent Mr. John M. Marshall, currently possesses valid Certified General Contractor's and Underground Utility and Excavation Contractor's licenses and there are no pending complaints against this individual (copies enclosed). Based upon their submittal of the lowest, responsive Base Bid, Marshall Brothers Construction & Engineering, Inc. meets the bidding process criteria for award. It is recommended that the Base Bid contract amount of two million two hundred thirty five thousand seven hundred eighty dollars and no cents (\$2,235,780.00) be awarded.

As always, please contact me should you have any questions regarding this matter. This opportunity to serve the City is greatly appreciated.

Sincerely,
